Masterpiece... not for the story or gameplay.. Played this game in my youth, so happy I found it on steam. Lots of fun, keeps the brain moving; super nostalgic :)

Great little game!. Disappointing. Combat mostly consists of selecting an angle and range and hitting fire. Need to play to unlock things, ahistorical campaign, ship design limited to selecting options for turrets.. Vortex Attack is pure arcade fun. Unlockable ships and different levels and enemies add variety to the solid game core.

While the start may seem a bit slow for expert players, the gameplay soon becomes tense and frantic. You will want to try again every time you die... and you will die... a lot ;). Game won't even start on Win 7 x64 SP1, That after making you enter a serial key, registering the game and then asking you to write down another code "for future reference".. Just another one of thos racing games that if you approach a bend too fast the only thing that will happen is that you will go straight ahead instead of turning. No amount of steering or braking will alter your path, once it decides you were going too fast, it will continue to go in a straight line until you hit something or if there was enough room your speed slowly decreases to almost stopped. If you like uncontrollable car games, fantastic, buy it!. I first played this game when I had hit my early teens and the first personal computers were truly making their way into the homes of the general population, and now 20 years later I finally managed to complete it. I highly recommend it for anyone to feel that nostalgia and see what a great game this was.

. Jokes aside, it fires a missile made of fork like objects that works similar to charged bullet.  
. Ooo the movment is not so good, I don't get motion sick from much but the sliding was pushing me to the edge in combat. Seemed like it should be fun but I was dropping frames all the time on 770. Also no reall sense of clipping, Your axe would just swwing right through a row of guys. Maybe a if you have a beefier system give it a look but the combat didn't get me going.

No thank you.. This game is very similar to many of Blaze's other games, but with a more open world style, and it takes a bit longer. The you-don't-if-you're-making-progress style of gameplay is slightly tedious because of frequent back tracking, but I like it. Although at one point there were so many split paths inside of split path that I had to write them all down on a piece of paper. The post-apocalyptic visuals were cool, and some fun bosses (except for the last one). I had to get out a key spammer for that last boss. I had a tactic where he charged and I ran back then turned around and hit him. A good enjoyable few hours.

P.S. on most of his other games I liked to play through them in about 2-3 days, but I took my time on this one (about 2 weeks) and I found it to be more fun and less frustrating.. A beautiful little Metroidvania with excellent music, challenging but fair gameplay and a lot of heart.

One of the best Greenlight games I've ever played and actually the first time I've felt compelled to complete a game 100% for the achievements.

Make a home for this in your collection, it's a steal and an excellent use of 10 hours or so.. Has very promising seasonal vibes!  
10/10 It's ♥♥♥♥ing fall y'all!. Frustratingly addictive
